

Please stop the continued trend of corporate media groups using public airways to broadcast political agendas. Sinclair's decision to force stations to air an anti-Kerry documentary is too politically charged and biased to be considered fair and unbiased media. Any political documentary that is biased in EITHER direction does not belong on the airwaves, unless it is accompanied with an alternative view. This is the responsibility of the FCC to keep our airwaves serving true democracy. Please pressure Sinclair to not use their media control for political agendas, and please continue to strengthen media ownership rules.

Thank You
